

Verbatim Ledger

Every word. Every speaker. On the record.

OFFLINE DESKTOP SOFTWARE FOR FAMILY-LAW ATTORNEYS AND SMALL FIRMS

WHAT IT DOES

Verbatim Ledger turns family-law audio recordings (hearings, mediations, voicemails, custody exchanges) into structured, review-ready transcripts with a verifiable record of exactly what was processed.

FEATURES

Word-level timestamps

Every word is time-coded to the audio for fast, precise citation.

Named speakers

Identify each participant by name, including brief appearances.

Overlap & inaudible flags

Crosstalk and unclear passages are marked, never guessed.

Key-statement summary

A concise summary of significant statements sits up front.

SHA-256 chain-of-custody ledger

Every source file and output is fingerprinted and logged.

Review & export

Correct anything, then export a clean PDF transcript.

Runs 100% offline. Your client audio never leaves your computer.

Free and open source · macOS & Windows
